- ▶ **Provide Optimal Support & Security**
 - ▶ **Tested & Trusted Industry Designs**

2021 Edition

THE CUSTOM DESIGN PROCESS

Our custom pallet design software (PDS) delivers a product that meets your exact needs. PDS can create a totally new pallet or redesign an existing one to conform to any set of guidelines.

Our design experts, combined with our software analyze:

- Maximum load weight for a variety of wood species
- Durability analysis, life-cycle analysis, and amortization schedules
- Other components of your supply chain

Not all pallets are created equal.

BENEFITS OF CUSTOM PALLETS

LOWER PACKAGING COSTS

When a pallet properly supports your product, it may be possible to lower the cost of packaging needed to protect your product.

OPTIMIZED SPACE

Our custom design experts take into account your warehouse space and capabilities, to ensure that our products make the most efficient use of your space.

BETTER SUPPORT

Our custom design experts take into account the weight, size, and other parameters of your product. This ensures that our products provide the best support for your products.

Custom pallet overview video
